

Communication

Middleware integrates with

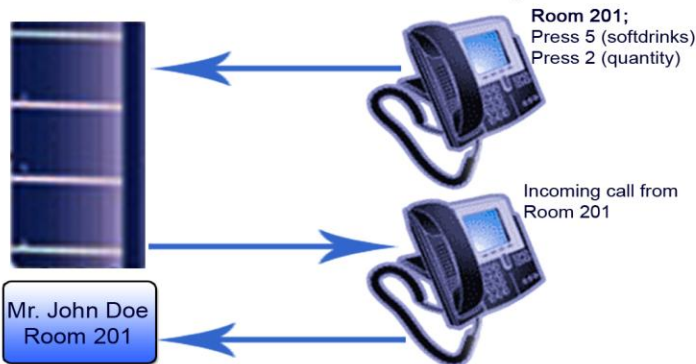

PABX Communication Middleware is a feature of Jinisysoft's Call Accounting System (Call+) that integrates with some of the most popular PABX brands including NEC.

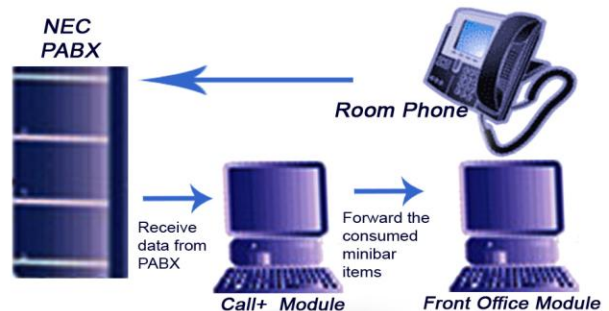

CTI-based housekeeping management module that enables the housekeepers to update room status (room dirty or room clean) directly from the hotel room phone.

Manages the Mini-Bar Sales from the guest room phone. The housekeeper shall inspect the room's consumed minibar items and forward the information to the front office module via guest room phone.

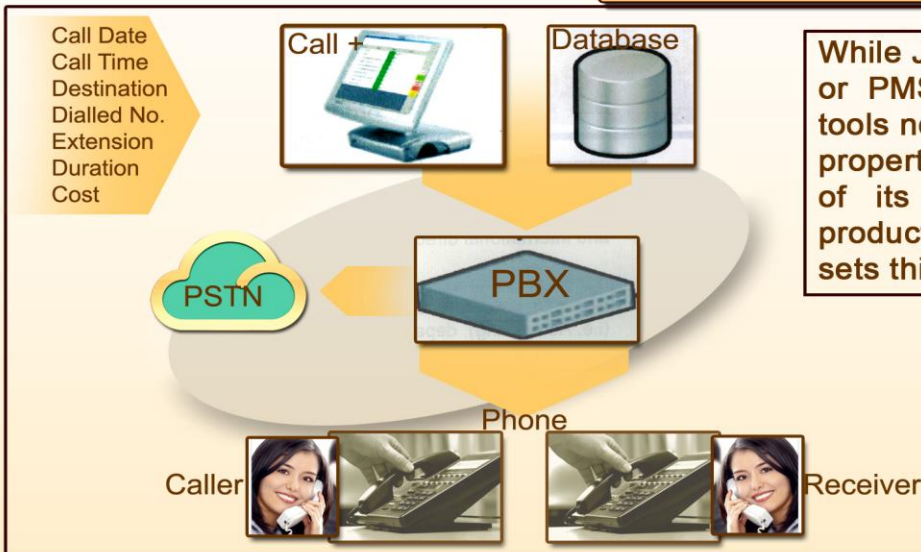

Triggers Wake - Up Call on room phone from the Front Office Module.

Sets a guest name for all room phones. When calling to/from the room phones, hotel staff will immediately recognized the name of the guest.

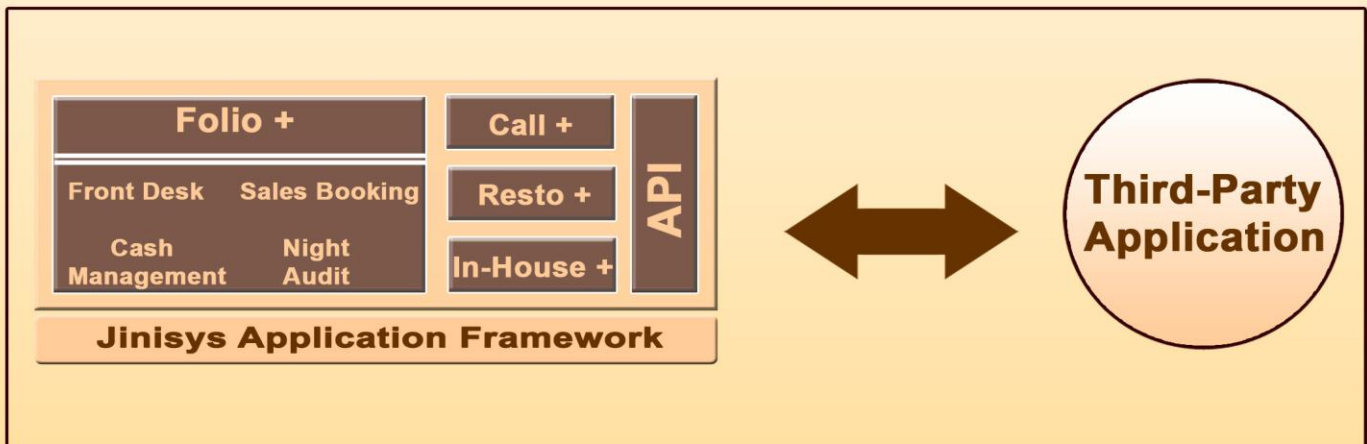

System Flow:

Seamlessly Integrated

While Jinisys Communication Middleware or PMS has rich features and provides the tools necessary to strategically manage a property independently, the seamlessness of its integration with other Jinisys products and third party vendors is what sets this system apart.

System Requirement

SERVER

Digital/Analog PABX
Trunk Line
PC

Windows Server R2 2008/ Windows 7
Intel Xeon
6 GB RAM
Database: mysql, oracle
2 X 500 GB HDD
Raid 0.1
Colored monitor with 1024 x 768 resolution

WORKSTATION

Supported OS: Windows 7
Intel Core i5
2 GB RAM
500 GB HDD
Colored monitor
with 1024 x 786 resolution
