

# Folio +

integrates with 

**Folio Plus** is a powerful but easy-to-use hotel management system. It automates hotel management operations such as guest reservation, room transfers, guest check - in/check - out, group bookings and other front desk activities. It improves the flexibility and accuracy of charges posting as well as balancing guest's account. It enables the user to be up-and-running and productive in no time with its familiar Windows look-and-feel and graphical data manipulation approach.

## "Taking Hotel Management To The Next Level"

### **Scalable**

Multiple site support. In the case of multiple site property, you can define more than one hotel site in a single application instance.

### **Secure**

Provides a fine-grained control of access rights and privileges to system modules.

### **Creates productivity**

Provides the tools to help you run your operation at a greater level of productivity. It includes an extensive guest management facility and comprehensive reporting features for in - depth operational analysis.

### **Complete Control**

Set-up individual rates as well as multiple room allocation with complete flexibility.

### **Microsoft Office Integration**

Provides a seamless integration with common desktop utilities such as Excel and Word to empower users in areas such as: financial reporting, mail merging and the like.

### **SAP integration**

Provides native data integration facility to SAP Financials for direct posting of charges to guest's account ledger.

### **Data Management**

Provides a back-up scheduler that back-up recorded data in a specific date and time.

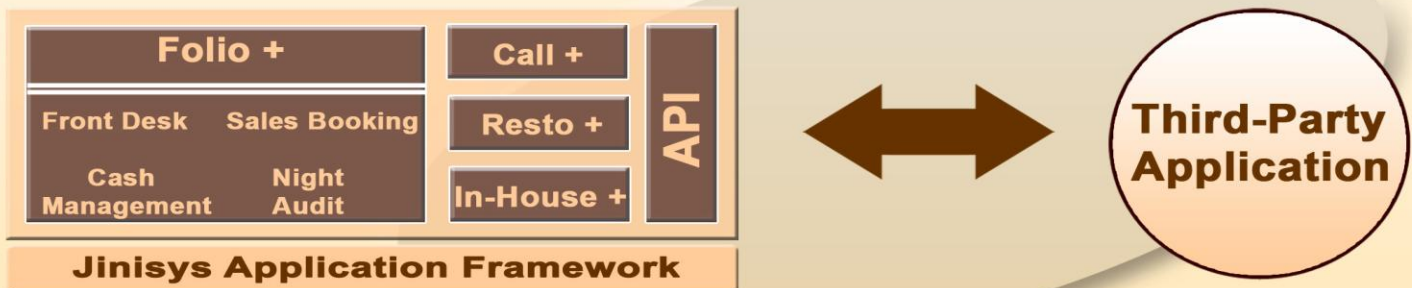

What's amazing about Folio Plus is that everything is just a few clicks away.

- Do you want to know the room utilization rate?
- Does the guest want to share room and other charges with another guest?
- Does the route guest charges to another?
- Do you want to trace the transactions made on a particular day or time?

**Folio Plus** does not only enable your hotel staff to provide better and more efficient customer service, but it also provides information crucial to making critical business decisions.

## SYSTEM ARCHITECTURE

### Module Description:

#### Reservation

Creates and manages group and individual guest reservations.

#### Front Desk

Provides the ability to manage guest registration as well as various transactions and activities performed by the Front Desk.

#### Cash Management

Manages folio transactions and quick check-out procedures.

#### Night Audit
