

In-House+

Interactive Housekeeping System

integrates with 

Taking housekeeping management to the next level, *In-House Plus* is a technologically advanced yet easy-to-use housekeeping management system.

Instead of the usual manual updating of cleaning information, the same can be done using voice - assisted telephone-based facility set up inside the room.

In-House+, also has a feature for an effective audit room clean up activity by authorizing anyone other than the housekeepers to verify status and actual completion of the housekeeping tasks.

The productivity and efficiency of each housekeeper can be monitored and measured including that of the entire housekeeping department.

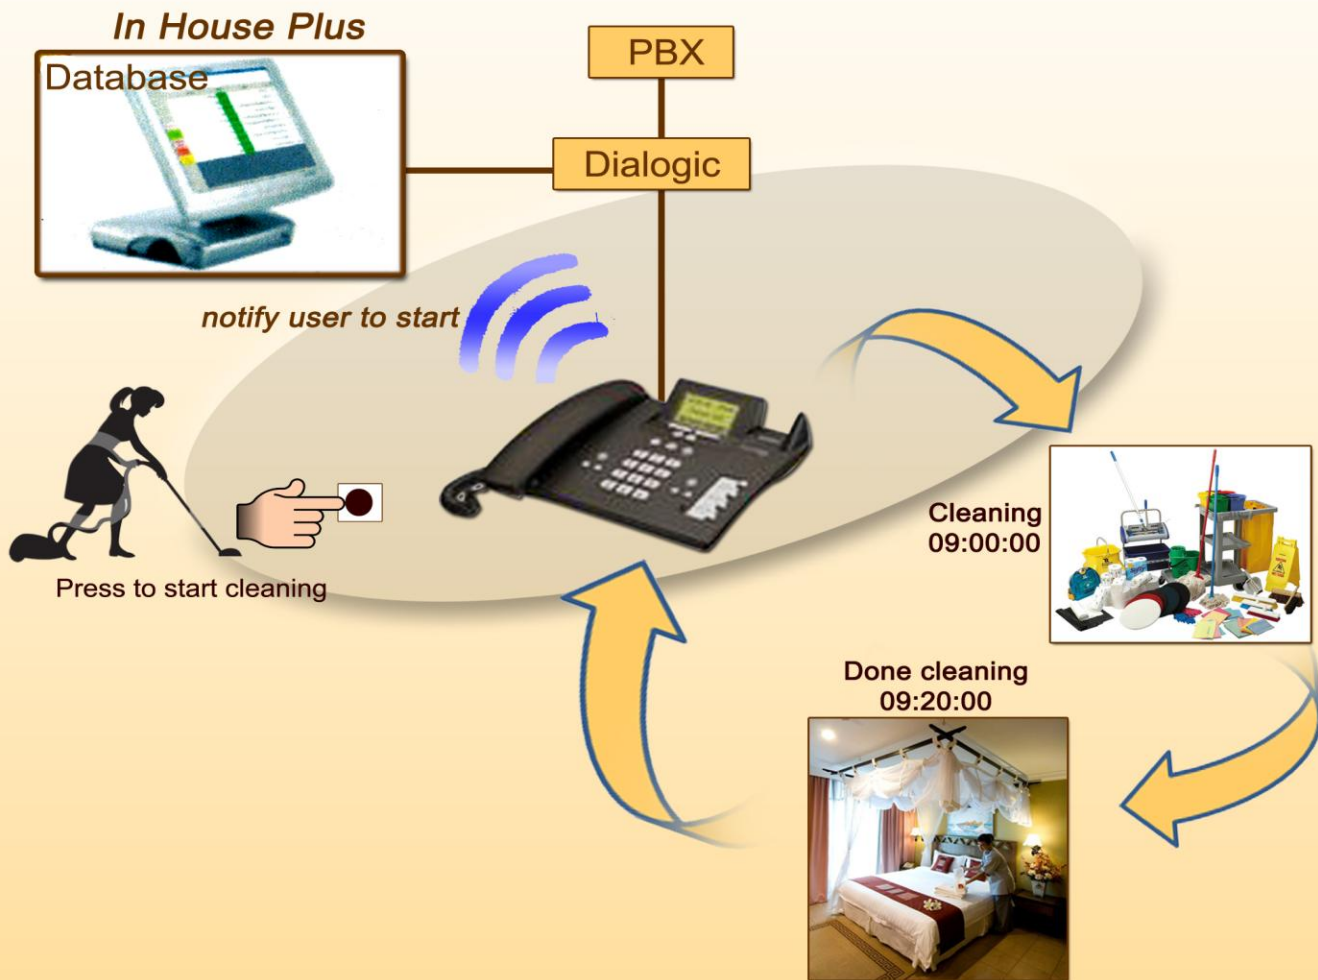

In addition, *In-House Plus* also keeps track of sales made from the mini-bars. Reports are generated on a per room, housekeeper, or by inventory item basis.

Plus, *In-House+* can be integrated with any existing hotel management system.

“Your 24 hour digital attendant...”

System Overview

System Requirement

Digital/Analog
PABX
Dialogic Card
PC with PCI

SERVER

Windows Server R2 2008/ Windows 7 Pro
