

Passage and Freight

Features

Ticketing

- Automated Fill-in Passenger's Ticket – passenger tickets will be printed to a pre-formatted ticket as specified by Shipping Company.
- Dashboard – provides an interface that shows the user the current sales per accommodation and cot blocking in real time.
 1. Ability to assign cot/bench number to passenger.
 2. Ability to view tabulated vessel seat plan.
- Reports – Passenger Manifest, Daily Sales Report per Trip, Vessel Occupancy Report.

Freight

- Automated Issuance of Bill of Lading – users can generate the BOL document for customers.
- Payment Management – customers can pay in cash, check or charge it to their account.
- Cargo Management per Customer – each customer has a specific list of items and its corresponding pricing.
- Reports - Cargo Manifest, Cargo Sales, Daily Sales Report.

Petty Cash Disbursement

- a. Petty Cash Disbursement Management – users can input daily office petty cash disbursement with corresponding codes that matches their chart of accounts.
- b. Reports – Daily Petty Cash Disbursement Report.

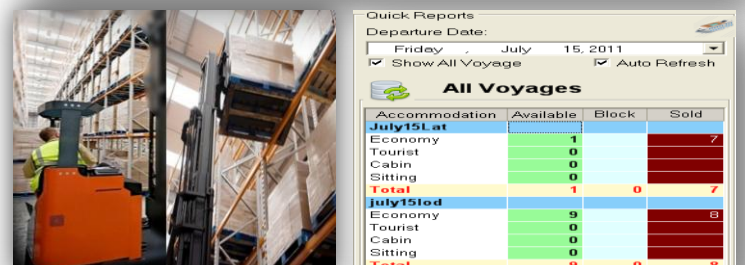

Scheduling

Vessel Information Management – users can create new vessels and fill in the corresponding information like cot numbers and accommodation.

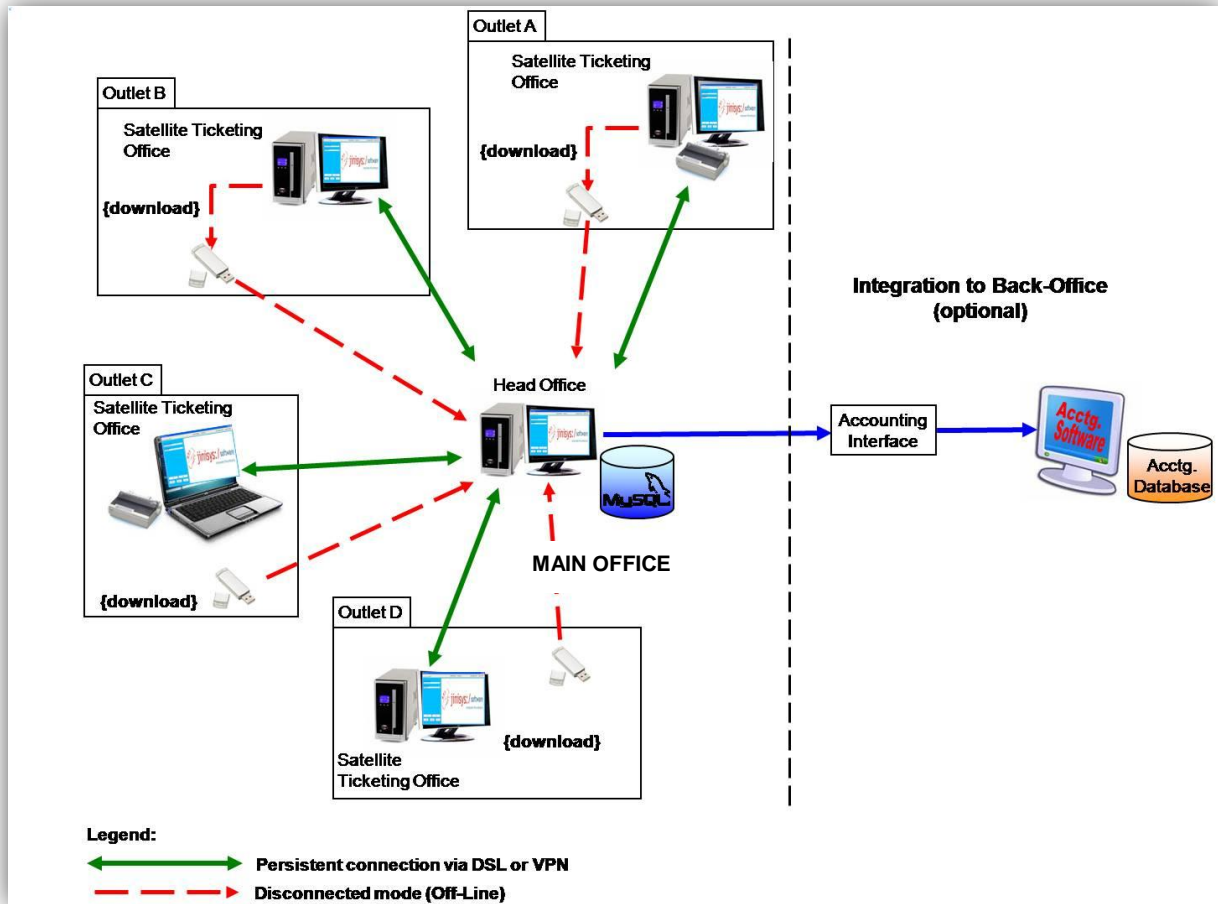

The Shipping Management Software allows the shipping company to streamline their ticket sales, freight charges and internal petty cash disbursement into one application.

The Shipping Management Software has five major modules: Ticketing, Freight, Petty Cash Disbursement, Scheduling and Back Office Connection to Accounting Software.

Ticketing handles the ticket sales and issuance, cot blocking, manifest generation and all reports regarding sales. The Freight module handles bill of lading, cargo computation and reports pertaining to freight charges. Scheduling module includes vessel information management and trip schedules. The Petty Cash Disbursement module enables the user to input all internal petty cash disbursement of the sales office.
