

Resto+

integrates with 

Say goodbye to confusion and stress in taking orders!

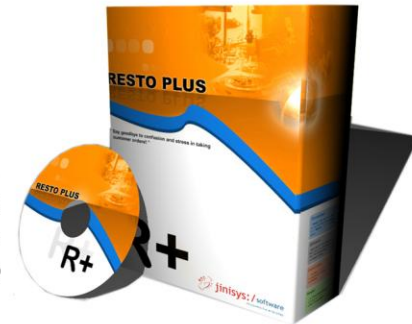

Resto Plus allows restaurant business owners to have complete control of the operation of their establishments by being able to take customer orders swiftly through its intuitive touch-screen interface, track real-time sales and inventory levels and even automatic routing of orders to the kitchen for on-screen food order instruction and even direct printing.

Kitchen Order Routing Sub-Module:

Automates sending of order instructions from the Resto+ terminal straight to the kitchen all without manual or physical intervention. A sound prompts the kitchen staff of incoming orders. The kitchen staff acknowledges then flags back the system of completed orders. This feature allows tracking of turn-around time from the moment the order is taken up to the time it is served. Providing analysis points on delays and bottlenecks that are valuable inputs to improving service levels.

In addition, with its fully-integrated system, customer profiles such as product preferences, seasons, price points, etc. are captured and enables business owners to make the right buying decisions.

Thus, with Resto Plus, relevant and efficient service will surely translate to happy and loyal customers.

FEATURES:

SAP Integration

Provides native data integration facility to SAP Financials for direct posting of charges to guest's account ledger
