

Jinisys Software Products: Equipping Businesses for Daily Operations

A Case Study for Panglao Regents Park Resort

Objective of the Case Study

This study aims to identify how Jinisys Software positioned itself in the software market by focusing on how its solutions and products impact a business' operations in a long-term basis.

Company

Panglao Regents Park Resort

Industry Type

Hospitality

Company Introduction

Panglao Regents Park Resort is located at Alona, Panglao and is surrounded by the Island's top tourist destinations. A 5-7 minute walk from the resort will allow you to reach the renowned Alona Beach. The resort offers various room rates and packages that one can avail. Panglao Regents Park has various facilities and services such as a swimming pool, restaurant, and a cocktail bar, this makes the resort a great value for guests.

Problem

Panglao Regents Resort needed a property management solution to help them handle various management tasks for resort operations. They also needed a robust IT network infrastructure for better business communication.

Solution

Jinisys Software's Folio+ [hotel system](#) was the perfect software solution for Panglao Regents' need for a guest reservation and booking, guest management, room management, and event management system. Jinisys' Resto+ software, fully integrated with POS hardware provided a better restaurant management experience. For finance operations, SAP Business One was the best fit for their accounting, operations, and HR tasks.

Above Infranet Solutions Inc., a sister company of Jinisys Software, has addressed the resorts' communication concerns by delivering a custom IT network infrastructure enabling LAN, WAN, telephony and internet connection.

Conclusion

By analyzing the resort's requirements, Jinisys was able to offer the appropriate product towards the client's specified needs. This made sure that every problem was resolved and client satisfaction was achieved.
