- Energy Saver Key Card
- Access Point for Wi-Fi
- NEC G2 Twin POS Touch screen

INFORMATION TECHNOLOGY

- Printers & P Touch Labeler
- Server and Windows Software

HOTEL MANAGEMENT SOFTWARE

- JINISYS FOLIO PLUS
- JINISYS RESTO-POS PLUS
- JINISYS HOUSE KEEPING PLUS
- JINISYS EVENT MANAGEMENT SOFTWARE
- JINISYS SPA PLUS
- JINISYS CALL PLUS (CALL ACCOUNTING SOFTWARE)
- SAP ACCOUNTING SOFTWARE

OTHER SERVICES

- Structured Cabling System (Copper/Fiber- Clipsal)
- Network Design & Management
- Centralized/Zone Paging System
- Operation & Systems Maintenance
- After-sales Support Services

TURN-KEY WEB APPLICATION DEVELOPMENT

Web application is an application accessed through the web browser (Internet Explorer, Firefox, Safari) over internet or intranet. One of the advantages of the web application is you can perform specified actions with just only an internet browser; no download-and-install actions needed.

We offer turn-key web applications development using the latest open-source technologies available using LAMP (Linux, Apache, MySQL, and PHP) software architecture.

In addition, we have the capability to integrate turn-key web applications with Asterisk PBX software.

PRODUCTS

Jinisys Hotel Management Suite

Folio Plus (Front Office Module)

Folio Plus is a system designed to make hotel service more efficient while making the lives of the hotel staff easier. The system provides the hotel with the capability to remember all its patrons through its Intellisense and has provisions for a tight security system. Thus, with Folio Plus, your patrons would feel valued and cared for.

Call Plus (Call Accounting Module)

Call Plus Call Accounting System is a highly efficient yet trouble-free call tracking system. It provides a quick and detailed record of both national and international direct dialing, and logs outgoing as well as incoming phone calls. It can discriminate calls made from the various sections of your company's structure, and keeps all the records in its system making them accessible to you anytime. With Call Plus, call tracking has become easier and more efficient.

In-House Plus (Interactive Housekeeping Module)

In-House Plus or Interactive Housekeeping System is a technologically-advanced housekeeping management system. It is a voice-assisted facility for updating a room's cleaning information as well as the mini bar sales. Moreover, the In-House Plus System also records each housekeeper's performance. Thus, with In-House Plus, housekeeping management has become easier and more efficient.

Resto Plus (Restaurant Management Module)

Resto Plus System is a system designed to make order-taking simple, fun, and easy. With Resto Plus, customer orders are taken directly from a restaurant Point-of-Sales terminal. It minimizes confusion and speeds-up order-taking, allowing your restaurant to provide better and more efficient services.

Event Management System

Event Management Module is an add-on to Folio+. It provides a hassle-free event management process. In just a click, this newest module will help your sales representative make a detailed and accurate event contract. This module also allows easy configuration and pre-setting of package inclusions and details. It's a quick and easy way all-in-one module.

Custom-Made System

Asset Management System

Asset Management System is simple yet powerful enough to meet the demand of your business' asset tracking requirements. The system can track the locations of your valuable assets right at your fingertips, allowing you to easily search for misplaced, unreturned, active or lost assets.

Interactive Queuing System

Queue Plus System is designed to make hospital queuing easier and more efficient. It's simple and easy to use. Both the clinic attendant and the patient are sure to be trouble-free when operating the Queue Plus. With Queue Plus System, your hospital will be able to provide better and more efficient services.

Freight Cost Analyzer System

Freight Cost Analyzer is a powerful solution and user-friendly application designed to make workload effortless and allow the company to reduce cost, increase productivity, and gains a competitive edge. It is intended for freight forwarders, consolidators, forwarding agents, couriers, warehouse providers and shipping lines.

Property Management System (Real Estate Management Module)

Real Estate Module allows the company to keep track of lots/units per property, their current value and their status. The system provides a tool for the company to easily manage pricing, payments, and sales of units/lots. Also, it keeps track of payables for brokers' commission and receivables for monthly amortizations.

The system is divided into two parts: web based and desktop application. The web based provides a real-time view for brokers on lots/units' current status per property while the desktop application provides all other functionalities. The system will also be integrated with any other accounting or ERP back-office system.

Point Of Sale (POS) System and Inventory System

Point-Of-Sale Plus is designed to simplify sales, inventory and the accounting process through seamless SAP Business One SP - ERP System integration. It has an easy-to-use users' screen which will help to speed up the sales process.

The system will also enable the company to manage its entire inventory from all its remote branches.

Point-of-Sale System is a very simple user interface with the ability to record customer information which can be seen through all branches.

Inventory Management System allows the user to see everything that is happening to the inventory through the audit trail screen. The inventory can also be managed through multiple locations.

Passage and Freight System

The Shipping Management System allows the shipping company to streamline their ticket sales, freight charges and internal petty cash disbursement into one application.

The Shipping Management System has five major modules: Ticketing, Freight, Petty Cash Disbursement, Scheduling and Back Office Connection to SAP / ERP System.

Ticketing handles the ticket sales and issuance, cot blocking, manifest generation and all reports regarding sales. The Freight module handles bill of lading, cargo computation and reports pertaining to freight charges. Scheduling module includes vessel information management and trip schedules. The Petty Cash Disbursement module enables the user to input all internal petty cash disbursement of the sales office.
